Professional Summary

Full-Stack Developer and Software Engineering Consultant with a proven record of designing, building, and deploying 20+ production web applications end-to-end. Specialized in high-throughput backend services (Node.js, Express.js, Spring Boot) and component-driven frontends (React.js, TypeScript). Expertise spans database schema modeling (PostgreSQL, MongoDB), microservices containerization with Docker, CI/CD automation, and rigorous API security (JWT, RBAC, OpenAPI/Zod). Demonstrated delivery impact: maintained a 95%+ on-time delivery rate, achieved sub-200ms latency, and sustained 99.9% system uptime. Ranked top 0.5% globally in competitive programming (1200+ DSA solved, 900+ on LeetCode, 500 Days Badge, 1800+ rating).

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, C, C++, Python, SQL
Frontend Development: React.js, Next.js, Redux Toolkit, Component-Driven UIs, HTML5, CSS3, Tailwind CSS
Backend & APIs: Node.js, Express.js, Spring Boot, RESTful APIs, WebSockets, OpenAPI / Swagger, Zod Validation, Microservices
Databases & Optimization: PostgreSQL, MongoDB, MySQL, Composite Indexing, Query Optimization, Caching, Schema Design
DevOps & Cloud Hosting: Docker, Container Isolation, CI/CD Automation Pipelines, Git, GitHub, Postman, Vercel, AWS
Security & Architecture: Role-Based Access Control (RBAC), JWT Authentication, IDOR/BOLA Mitigation, Concurrency Control

Software Engineering Experience

Freelance Full-Stack Developer / Software Engineering Consultant — Remote
Self-Employed — *May 2024 – June 2026*

- Delivered 20+ full-stack web applications end-to-end for commercial clients, translating complex business requirements into technical architectures and database schemas (PostgreSQL, MongoDB) with a **95%+ on-schedule delivery rate**.
- Engineered high-throughput RESTful APIs (Node.js, Express.js, Spring Boot) and component-driven UIs (React.js, TypeScript); achieved **sub-200ms response times** and **30%–40% latency reductions** via composite indexing and caching.
- Secured application workflows by integrating JWT authentication, granular RBAC, and OpenAPI/Zod validation layers; performed pre-launch vulnerability assessments mitigating IDOR/BOLA risks.
- Containerized application services using Docker and automated CI/CD deployment pipelines to cloud environments (Vercel, AWS), maintaining **99.9% uptime** via automated health monitoring and concurrency-safe database write locks.
- Executed post-launch maintenance, database optimization, and rapid defect resolution, achieving a **¡24-hour turnaround** on critical hotfixes and a **100% final milestone sign-off rate**.

Key Technical Projects

InstaVEG | *React.js, TypeScript, Node.js, PostgreSQL, Drizzle ORM, Docker* — Live Demo

- Architected a role-based marketplace platform (Buyer, Seller, Admin) with JWT authentication and strict RBAC; conducted a security audit that identified and patched critical IDOR/BOLA authorization flaws prior to deployment.
- Constructed a type-safe REST API layer with OpenAPI-first contracts and Zod schema validation, preventing malformed data payloads and reducing database query execution times by 40% via composite indexing.
- Integrated real-time order tracking, operational analytics, and Razorpay payment gateways (React.js, TanStack Query); containerized services with Docker to ensure isolated, reproducible production deployments.

Appointy | *React.js, Node.js, Express.js, MongoDB, Razorpay, WebSockets* — Live Demo

- Designed a multi-role appointment scheduling system with specialty-based provider discovery, modeling MongoDB schemas to ensure low-latency availability querying under high concurrent traffic.
- Diagnosed and resolved concurrency race conditions causing slot double-booking, implementing atomic write operations and locking logic to guarantee 100% data consistency and zero scheduling regressions.
- Implemented multi-mode Razorpay payment infrastructure with end-to-end booking state management; automated deployment workflows with Docker containerization.

Education

Bachelor of Technology in Electronics & Communication Engineering — 2023 – 2027
JECRC Foundation (Rajasthan Technical University) | CGPA: 8.6 / 10.0 — *Jaipur, Rajasthan*

Achievements & Certifications

- **Competitive Algorithmic Problem Solving (Top 0.5% Globally):** Solved **1200+ DSA problems** across platforms (**900+ on LeetCode**, **1800+ contest rating**, **500 Days Badge**); achieved **Global Rank 198** in LeetCode Biweekly Contest 174 and **Global Rank 375** in Biweekly Contest 190. — LeetCode
- **Oracle Cloud Infrastructure (OCI) 2024 Generative AI Certified Professional:** Validated proficiency in enterprise LLMs, automated workflow pipelines, and AI system integration.
- **Smart India Hackathon (SIH) National Finalist:** Collaborated in high-velocity agile sprints to build, test, and present functional software prototypes to national evaluation panels.
- **JPMorgan Chase & Co. Software Engineering Simulation (Forage):** Developed high-throughput transaction processing microservices and asynchronous event-driven messaging pipelines using Java, Spring Boot, and Apache Kafka.
- **Technical Workshop Leadership ("Protocraft"):** Invited Guest Speaker by DevCrest JU at JECRC University; conducted a hands-on workshop on UI/UX architecture and design-to-code translation.
