Professional Summary

Mobile & Full-Stack Software Engineer with strong core fundamentals in React Native, TypeScript/JavaScript, Android architecture, and scalable REST APIs. Proven track record building responsive, high-performance UI layouts, implementing SOLID design principles, and managing end-to-end production lifecycles. Solved 1200+ DSA problems (1700+ contest rating, Global Rank 198 on LeetCode), Smart India Hackathon Finalist, and UI/UX speaker.

Technical Skills

Mobile & Frontend: React Native, Android Development, React.js, TypeScript, JavaScript, Redux Toolkit, Tailwind CSS, HTML5/CSS3, Mobile Animations
Architecture & Practices: SOLID Principles, Component Lifecycle Optimization, State Management, RESTful API Integration, RBAC, UI/UX Prototyping
Backend & Storage: Node.js, Express.js, PostgreSQL, MongoDB, REST APIs, Drizzle ORM, JWT Authentication, Rate Limiting Fundamentals
Tools & Platforms: Git, GitHub, Docker, Postman, Vercel, Android Studio, CI/CD Pipelines, Figma
Core Foundations: Data Structures & Algorithms, Object-Oriented Programming (OOP), OS, Computer Networks, DBMS

Projects

InstaVEG | *React Native/React.js, TypeScript, Node.js, PostgreSQL, Drizzle ORM* Live Demo

- Engineered a modular, multi-role marketplace client applying SOLID principles, strict TypeScript type-safety, and Zod schema validation to eliminate runtime UI exceptions.
- Built high-performance, responsive UI screens with real-time state synchronization (TanStack Query), reducing unnecessary re-renders across dynamic catalog and analytics views.
- Integrated Razorpay payment workflows and real-time order tracking; designed secure backend REST endpoints with JWT authorization, rate limiting, and RBAC.
- Containerized application services using Docker to ensure environment parity across testing, staging, and deployment workflows.

Appointy | *React Native/React.js, JavaScript, Node.js, Express.js, MongoDB* Live Demo

- Designed and implemented dynamic appointment discovery and booking interfaces with fluid transitions and mobile-first layouts.
- Engineered concurrency-safe scheduling logic on the backend, resolving slot collision race conditions during high-volume simultaneous booking attempts.
- Constructed reusable component architecture and integrated secure RESTful API endpoints for client data fetching, doctor status updates, and transaction handling.
- Integrated multi-mode payment flows and automated lifecycle status notifications to enhance user engagement and platform retention.

Experience

Freelance Mobile & Full Stack Developer Remote
Independent Engineering Engagements *May 2024 – Present*

- Architected and delivered 10+ custom web and cross-platform applications end-to-end, working directly from product specifications to deployment and live iterations.
- Developed smooth, animated UI components and robust client-side state architectures using JavaScript, TypeScript, and modern styling libraries.
- Engineered secure backend integrations using Node.js, Express.js, and PostgreSQL/MongoDB with JWT authentication, structured error boundaries, and input sanitization.
- Provided continuous production support, implementing rapid feature iterations, layout fixes, and network request optimizations based on active user feedback.

Education

Bachelor of Technology in Electronics & Communication Engineering 2023 – 2027
JECRC Foundation (Rajasthan Technical University) | CGPA: 7.8/10 *Jaipur, Rajasthan*

Achievements & Leadership

- Solved **1200+ DSA problems** across platforms (800+ on LeetCode), achieving a **1700+ contest rating** (Global Rank **198** in Biweekly Contest 174; Global Rank 1576 in Contest 175). LeetCode Profile
- **Smart India Hackathon (SIH) Finalist** and active participant across multiple national hackathons building rapid prototypes under tight deadlines.
- **Guest Speaker at JECRC University** for "Protocraft" — conducted hands-on technical sessions on Figma, UI/UX engineering, and design systems for 100+ attendees.
- **Co-Founder, Flickies**: Led digital presence, user acquisition UI/UX, and technical asset branding for an independent apparel venture.
- **Certifications & Simulations**: Oracle Cloud Infrastructure Generative AI Professional; JPMorgan Chase Software Engineering Simulation (backend async workflows and API design).
