## PROFESSIONAL SUMMARY

Full-Stack Engineer focused on secure, scalable backend systems – React.js, Node.js, Spring Boot, PostgreSQL, Docker, and CI/CD. Architected multi-role, production-grade platforms with RBAC and payment infrastructure, including a self-directed security audit that closed authorization vulnerabilities pre-launch. 1000+ DSA problems solved (800+ on LeetCode), 1700+ contest rating, Smart India Hackathon Finalist.

## EDUCATION

**Bachelor of Technology in Electronics & Communication Engineering**

2023 – 2027

JECRC Foundation (Rajasthan Technical University) | CGPA: 7.8/10

Jaipur, Rajasthan

## TECHNICAL SKILLS

**Languages:** C, C++, Java, JavaScript

**Frontend:** React.js, Next.js, Redux, HTML, CSS, Tailwind CSS

**Backend:** Node.js, Express.js, REST APIs, JWT Authentication

**Databases:** MongoDB, MySQL, PostgreSQL

**DevOps & Tools:** Docker, CI/CD Pipelines, Git, GitHub, Postman, Vercel

**Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems

**Soft Skills:** Problem Solving, Self-Learning, Team Collaboration, Adaptability

## PROJECTS

**InstaVEG** | *React.js, TypeScript, Node.js, PostgreSQL, Drizzle ORM*

[Live](#)

- Architected a role-based marketplace (Buyer, Seller, Admin) with JWT authentication and RBAC; ran a self-directed security audit that identified and patched BOLA/IDOR authorization flaws before deployment.
- Built a type-safe REST API layer (Node.js, Express.js, PostgreSQL, Drizzle ORM) with OpenAPI-first contracts and Zod validation, preventing malformed data from reaching the database.
- Shipped real-time order tracking, seller analytics, and Razorpay payments (React.js, TanStack Query); containerized the stack with Docker for reproducible dev/prod environments.

**Appointy** | *React.js, Node.js, Express.js, MongoDB, Razorpay*

[Live](#)

- Designed a multi-role appointment platform (Patient, Doctor, Admin) with specialty-based discovery, modeling MongoDB schemas for real-time availability under concurrent booking load.
- Found and fixed a race condition allowing double-booked slots, adding concurrency-safe write logic to guarantee scheduling consistency under simultaneous requests.
- Integrated Razorpay across multiple payment modes with full booking-lifecycle management; Dockerized services for consistent local and production deployment.

## EXPERIENCE

**Software Engineering Virtual Experience**

Remote

JPMorgan Chase & Co. | Forage

2025

- Completed backend engineering tasks using Java, Spring Boot, and Apache Kafka for async transaction processing in a simulated enterprise environment.
- Implemented JPA entities, repositories, and RESTful APIs for balance update logic and external incentive integration using H2 SQL database.

**Freelance Full Stack Developer**

Remote

Self-Employed

May 2024 – June 2026

- Owned 15+ full-stack apps end-to-end for independent clients – requirements, architecture, deployment – as sole engineer on each engagement (React.js, Node.js, Express.js, REST APIs).
- Built JWT-authenticated REST APIs and responsive, production UIs (Tailwind CSS), working directly with clients to ship features on tight timelines.

## ACHIEVEMENTS

- Solved 1000+ DSA problems across platforms (800+ on LeetCode), achieved a 1700+ contest rating, and earned the 500 Days Badge. [Leetcode](#)
- Secured Global Rank 198 in LeetCode Biweekly Contest 174 and Global Rank 1576 in LeetCode Biweekly Contest 175 among thousands of participants worldwide.
- Finalist at Smart India Hackathon (SIH) and participant in multiple national-level hackathons.
- Invited as Guest Speaker at JECRC University for “Protocraft” – a Figma and UI/UX Design Workshop organized by DevCrest JU.
- Co-founded Flickies, a Jaipur-based streetwear brand, leading branding, creative design, and digital presence.
- Oracle Cloud Infrastructure Generative AI Professional | Deloitte Data Analytics Job Simulation (Forage).
